ABOUT

2nd year CS undergrad at SRM. I build stuff — web apps, CLI tools, blockchain contracts, whatever needs building. Ranked 125/4000+ in a Solana security bootcamp which was intense but worth it. I spend most of my time in a terminal on Arch Linux, currently going deep on Rust. I care a lot about how things work at the systems level — OS internals, compilers, distributed systems. Not a specialist yet but I ship things and I pick up new stuff fast.

SKILLS

Languages C/C++, JavaScript, TypeScript, Python, Rust, Solidity, HTML/CSS
Frontend / Backend React.js, Three.js, MERN Stack, Node.js, Express.js, MySQL, MongoDB
Blockchain Solana, Anchor Framework, Smart Contracts, Security Auditing
Systems & Tools Linux (Arch, Hyprland), Git, AWS basics, Figma, Pandas, NumPy

EXPERIENCE

Solana Rust Security Bootcamp — Top 3% · Rank 125 / 4000+ 2026
Rektoff — Cohort #4

- Selected from 4000+ applicants; hands-on training in Rust, smart contract auditing, and vulnerability analysis.
- Performed security audits and identified exploits in live Solana-based programs.

Core Team Member & Discord Moderator 2025 – Present
Genesis — Web3 & Blockchain Community

- Help run a student-led Web3 community of 500+ members; organise hackathons, workshops, and educational events.

PROJECTS

OS-Mon Academy osmon-academy-4.vercel.app 2025
React · TypeScript · Three.js

- 3D browser-based educational RPG teaching OS concepts (processes, memory, scheduling, deadlocks) through Pokémon-style gameplay — 18 creatures, 7 areas, battle system, and quiz engine.

Rustyfetch crates.io/crates/rustyfetch-cli 2025
Rust · CLI

- Neofetch-inspired system info CLI written in Rust; displays OS, kernel, CPU, memory, and uptime. Published on crates.io — `cargo install rustyfetch-cli`.

blockHarvest github.com/TheNobady/blockHarvest 2025
Solana · Anchor · Rust

- Decentralised application on Solana with smart contract integration, wallet connectivity, and collaborative on-chain logic.

Disaster Management Platform sih-hack-five.vercel.app 2025
Full-stack · Smart India Hackathon

- Full-stack disaster awareness platform for coastal regions with real-time alert features, built for Smart India Hackathon.

EDUCATION

SRM Institute of Science and Technology, NCR Campus 2024 – 2028
B.Tech — Computer Science Engineering (Cloud Computing)

- Relevant coursework: Data Structures & Algorithms, Database Management, Cloud Computing, Operating Systems.
